

COVID - 19 Community Support Programs

Base Titanium has partnered with the Stanbic Bank and other private sector companies to donate 192 non-invasive ventilators. These will help to save lives during COVID -19 and will provide a legacy of improved health care services for years to come.

Ventilator Donation

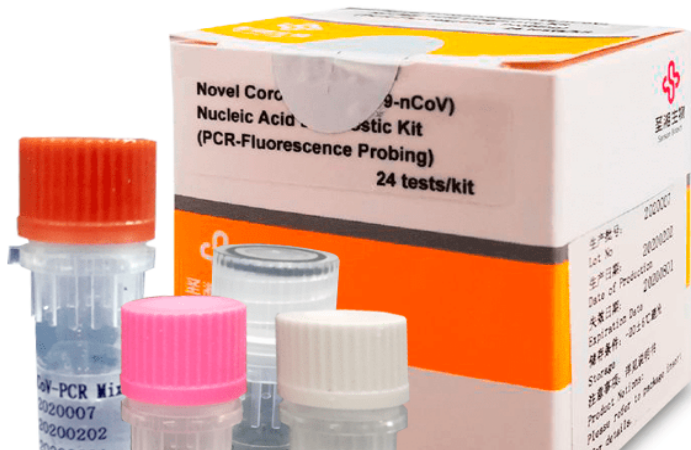

Base contributed 100 of the 192 ventilators donated to the Ministry of Health, an investment in COVID-19 treatment and Kenya's health service more broadly.

With the support of Principal Secretary for Mining Ambassador Kaberia, the donation of ventilators represents the cornerstone of Base's COVID -19 support to the national government.

Test Kit Donation

Base has also donated over 1,300 COVID-19 testing kits to the Ministry of Health.

Keep Yourself Safe

Wash your hands often with soap and water for at least 20 seconds

Wear a mask when you're going out and put it on properly

Supporting the government's rigorous testing regime is vital to understanding the spread of COVID -19 and reducing further infections.
